

# **ERC1400 Token Development Company - Osiz**

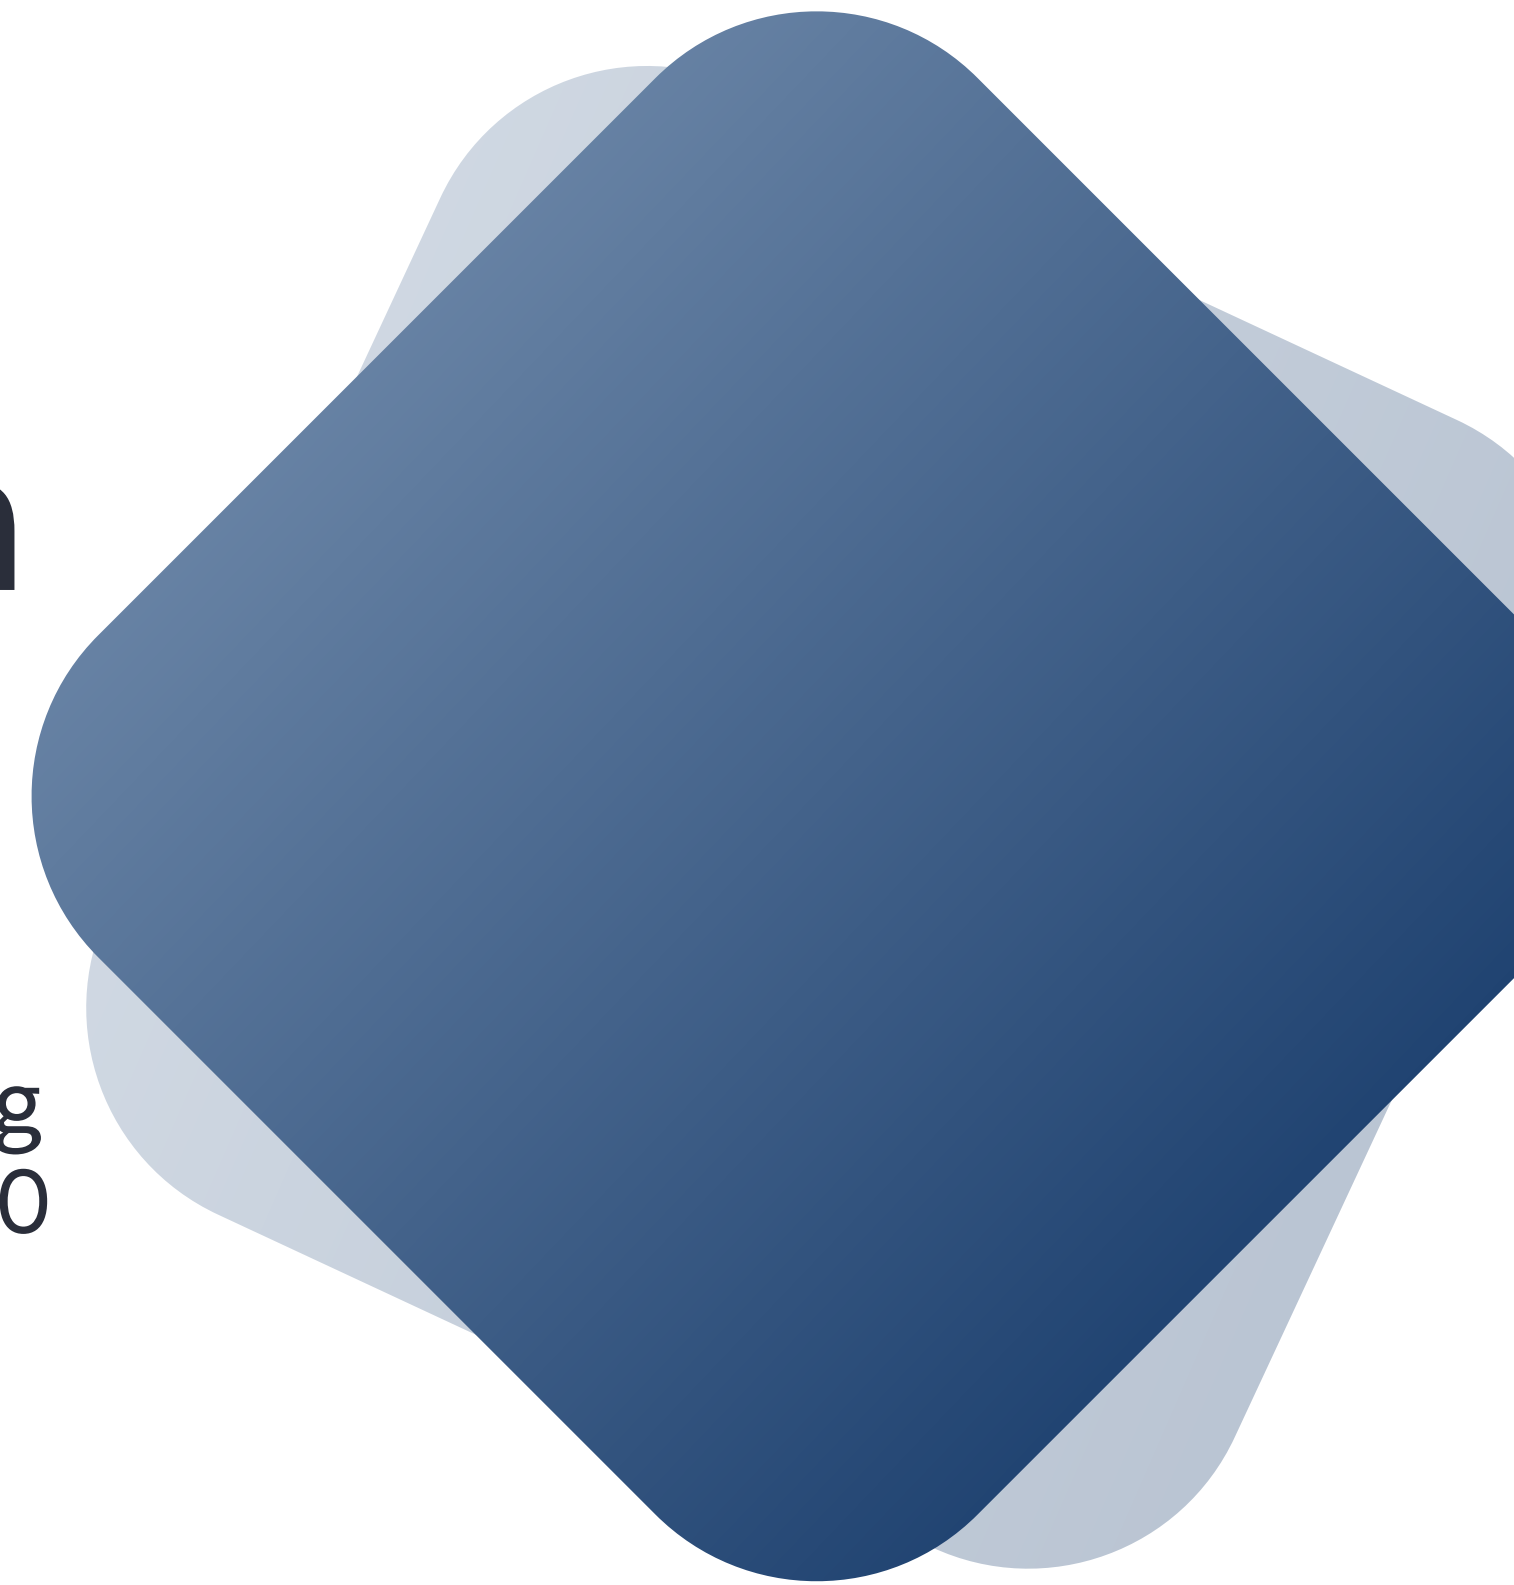

ERC1400 tokens are a strong new standard that is revolutionizing the form tokens are created and used on the Ethereum blockchain. We Osiz is a leading ERC1400 token development company we can help you bring your vision to life.

# What Is ERC1400 Token Development?

ERC-1400 token development is a process for creating security tokens on the Ethereum blockchain. ERC-1400 offers greater control and compliance features for these tokens. This allows issuers to restrict who can buy them and ensures they follow regulations. ERC-1400 is built on the existing ERC-20 standard, so it benefits from existing tools and infrastructure. This makes ERC-1400 a promising standard for creating secure and compliant security tokens.
